

## SEE EVERYTHING, MISS NOTHING.

THE MOST AFFORDABLE AND COMPREHENSIVE DIGITAL DATA FUSION AND ANALYTICS TOOL AVAILABLE. THIS CLOUD-HOSTED THIN CLIENT SOFTWARE AS A SERVICE (SAAS) IS SET TO REVOLUTIONIZE HOW LAW ENFORCEMENT INVESTIGATES CRIME.

### KEY FEATURES AND CHARACTERISTICS

#### Time & Location

Data is integrated and visualized in one analysis window. Scroll through events on the timeline and dynamic map, zooming in and out on time and geographic areas of interest. Displays are linked and update automatically with your selections and analytic functions.

#### Drag & Drop

Simply drag and drop your data directly into your subject of interest. NightHawk automatically identifies and imports the relevant files and information, eliminating the need for manual extraction and parsing.

#### Subject Interaction Filtering Tool (S.I.F.T)

Scroll through and observe conversations, calls, messages, and events in time order to identify key moments. View complete conversations across media types and watch as targets switch between communication methods. See how GPS trackers, gunfire acoustic identifiers, LPR hits, and other data relate in time.

#### Intersect

Analyze features across various data sets (social media, CDRs, GPS, etc.) for any time frame or location, and in relation to other events. Identify indirect commonalities between subjects and find shared addresses, contacts, messages, and more.

## Link Chart

As you analyze and build your case, watch your link chart automatically develop. Upload mugshots and case photos for better visualization of people, places, and things. Link charts are crucial for managing and navigating large-scale investigations.

## Export

Create case artifacts directly from the Map, Interaction Diagram, S.I.F.T., Intersect Tool, List, and Link Chart. Save them within your case or download them for reports and affidavits. Build your case presentation efficiently with NightHawk.

## Collaborate

Control access for users within and outside your agency, providing view-only or view-and-modify privileges as needed. Collaborate across city lines for crimes like robberies, narcotics, and burglaries. Criminals don't respect boundaries, and neither should your software.

## Real Time

NightHawk enables real-time collaboration, showing who is in your case and what they're doing. Investigators can upload, analyze, and add information simultaneously, with instant updates for everyone, whether they're next door or across the country. Timely intel is actionable intel.

## TESTIMONIALS

*"Using Nighthawk LEOVision for analysis, I was able to get surveillance headed to the associate's address in under 10 minutes of receiving the phone records. It's a true game changer."*

Fugitive Apprehension Officer  
Federal Task Force  
Colorado

*"Every case has digital data evidence, and how law enforcement and investigations are changing, being able to work - to analyze and get actionable leads from digital data is huge. I don't know how we ever survived without LEOVision. Every case I work I look to LEOVision because it gets me wins."*

Homicide Detective  
Major Portland Metropolitan  
Police Department  
Oregon

IN TODAY'S CLIMATE, EVERY INVESTIGATOR IS AN ANALYST. NIGHTHAWK HAS THE MISSION CRITICAL TOOLS TO BE THE FORCE MULTIPLIER YOUR AGENCY NEEDS.
